Summary. The Create Enterprise Geodatabase tool creates a database, storage locations, and a database user to be used as the geodatabase administrator and owner of the geodatabase depending on the database management system (DBMS) used. It grants the geodatabase administrator privileges required to create a geodatabase, and then creates a geodatabase in the database.

Create Enterprise Geodatabase—Help | ArcGIS for Desktop
Enterprise geodatabases are stored in and add functionality to databases. In ArcGIS Enterprise, you access the data in your enterprise geodatabase through ArcGIS Server web services. If you have an ArcGIS Enterprise (or ArcGIS Server basic) license, you can create enterprise geodatabases.
