Each 3-day course will include classroom sessions on anatomy and physiology of the mare and stallion, control of the estrous cycle, gestation and foaling, feeding the broodmare and young horse, and estrous cycle manipulation of mares. Hands-on laboratory activities are scheduled each day and will include semen collection and evaluation, estrous detection, artificial insemination, body condition scoring, perineal conformation evaluation of the mare and foaling management.

### **Equine Reproductive Management Short Course - Animal Science**

Artificial insemination is useful to allow a stallion to breed more mares in a season. Also, in th e case of stallions with infections of the reproductive system, collected se- men can be treated with antibiotics. Finally, stallions can be collected using a phantom whenever needed and without exposure to an unruly mare.
