Chapter 7. Deploying Applications Red Hat JBoss Enterprise ...
In older versions of the application server, data source configuration was tied to a *-ds.xml file schema that you would deploy in the deploy directory of your configuration. In AS 7, the entire structure of the AS is different, and as you would expect, creating your own data sources is different as well.

Data Source Configuration in AS 7| JBoss.org Content ...
Marker files provide the new default approach for JBoss AS 7 exploded deployments. They consist either in empty files, with a suffix, which are placed by the user, or in files that are added by the container to indicate the outcome of an operation. The most relevant marker file is the.dodeploy, which triggers application re-deployment.
