Space Medicine In Project Mercury

Indeed, from the viewpoint of environmental medicine as an applied science, Project Mercury marked the swift transition from what had come to be known as aviation medicine to what is now recognized as space medicine.

Project Mercury Medicine Association

Project Mercury was the first human spaceflight program of the United States, running from 1958 through 1963. An early highlight of the Space Race, its goal was to put a man into Earth orbit and return him safely, ideally before the Soviet Union. Taken over from the US Air Force by the newly created civilian space agency NASA, it

About Project Mercury | NASA

After unmanned spacecraft flights by the United States and the Soviet Union succeeded in the late 1950s and NASA's first man-in-space program, Project Mercury, took shape in 1958, the role of space medicine became critical to mission success.
