The neuropathologies of the self (NPS; Figure Figure1) 1) is a proposed broad grouping of various syndromes in which the common factors are that a demonstrable focal brain lesion(s) or dementia causes an alteration in the patient's personal identity or personal relationships between the self and the world.The NPS may include many conditions (some of which are highlighted in the Figure Figure1 ...

Neuropathologies of the self and the right hemisphere: a ...

Disturbances of autobiographical memory can result from organic pathologies such as focal brain lesions and neurodegenerative diseases that affect brain areas critical for autobiographical memory processing. Likewise, autobiographical memory can be severely affected in psychiatric syndromes associated with metabolic brain changes in similar brain regions as in neurological diseases.

Autobiographical Disorders - Oxford Scholarshp
